

YOUR CONTENT RECOGNITION DIAGNOSIS

PERSONALIZED RESULTS GUIDE

Translate your Recognition Score into a clear diagnosis, priority pillar, and first action.

INSIDE THIS RESOURCE

- Four personalized score categories
- A focused next move for every result
- Lowest-pillar recommendations
- A fillable action commitment

Your score is a starting point, not a judgment.

YOUR DIAGNOSIS

Personalized result categories

Find your score range, then start with the recommended action.

15-29

HIDDEN VALUE

You have valuable expertise, conversations, and processes, but recognition is not yet a habit.

NEXT MOVE For seven days, record one useful conversation, one authority insight, and one process moment each day.

30-44

REACTIVE CAPTURER

You recognize content after obvious moments happen, but too much value still disappears before it is captured.

NEXT MOVE Create a five-minute recognition ritual after every client call, meeting, event, and delivery.

45-59

STRATEGIC RECOGNIZER

You notice valuable moments consistently. Your next gap is organizing, prioritizing, and assigning them for capture.

NEXT MOVE Use the Content Vault weekly and select only the highest-value discoveries for production.

60-75

CONTENT ASSET OPERATOR

Recognition is becoming part of how your business operates. Your opportunity is packaging and converting the value efficiently.

NEXT MOVE Build repeatable packaging, distribution, and conversion paths around your strongest recognized assets.
